Antonie van Leeuwenhoek **60**: 383–385, 1991.

CONTENTS Volume 60 1991

Volume 60 No. 1

van de Wijngaard W.M.H., Lugtigheid R.L. & van der Drift C.: Reductive activation of the corrinoid-containing enzyme involved in methyl group transfer between methyl-tetrahydromethanopterin and coenzyme M in *Methanosarcina barkeri* 1
Suzuki Y., Nagata A. & Yamada T.: Analysis of the promoter region in the rRNA operon from *Mycobacterium bovis* BCG 7
Kurtzman C.P.: DNA relatedness among saturn-spored yeasts assigned to the genera *Williopsis* and *Pichia* 13
Liu Z. & Kurtzman C.P.: Phylogenetic relationships among species of *Williopsis* and *Saturnospora* gen. nov. as determined from partial rRNA sequences 21
Kurtzman C.P.: *Saturnospora ahearnii*, a new salt marsh yeast from Louisiana 31
Takeo K. & de Hoog G.S.: Karyology and hyphal characters as taxonomic criteria in Ascomycetous black yeasts and related fungi 35
Brenner V., Holubová I., Benada O. & Hubáček J.: Characterization of new plasmids from methylotropic bacteria 43
Hofmann K.H. & Polnisch E.: Catabolite inactivation, cyclic AMP and protein phosphorylation in the methylotrophic yeast *Hansenula polymorpha* 49
Péter G. & Deák T.: On the false positive urease activity of *Yarrowia lipolytica* 55
Chen G.-Q., König K.-H. & Lafferty R.M.: Production of poly-D(-)-3-hydroxybutyrate and poly-D(-)-3-hydroxyvalerate by strains of *Alcaligenes latus* 61

Volume 60 No. 2

Nzeako B.C., Hastings T.S. & Ellis A.E.: Cultural conditions for *Aeromonas hydrophila* affect the production of haemolysins with differing host specificities 67
Ruiz-Herrera J.: Biosynthesis of β-glucans in fungi 73
Espuny M.J., Andres C., Mercade M.E., Robert M., Manresa M.A. & Guinea J.: R-bodies in *Pseudomonas aeruginosa* strain 44T1 83
Ahrné S. & Molin G.: Spontaneous mutations changing the raffinose metabolism of *Lactobacillus plantarum* 87
Prodromou C., Wright I.P., Evans I.H. & Bevan E.A.: Cloning of the *HIS3* gene of *Yarrowia lipolytica* 95
Chistoserdova L.V., Chistoserdov A.Y., Schklyar N.L., Baev M.V. & Tsygankov Y.D.: Oxidative and assimilative enzyme activities in continuous cultures of the obligate methylotroph *Methylobacillus flagellatum* 101
Xiuzhu D., Schyns P.J.Y.M.J. & Stams A.J.M.: Degradation of galactomannan by a *Clostridium butyricum* strain 109
Andersen B.: Consistent production of phenolic compounds by *Penicillium brevicompactum* for chemotaxonomic characterization 115
Bode R.: Valine inhibition of β-isopropylmalate dehydrogenase takes part in the regulation of leucine biosynthesis in *Candida maltosa* 125

Volume 60 Nos. 3 / 4

Special Issue: Quantitative Aspects of Growth and Metabolism of Microorganisms
Dedicated to Prof. A.H. Stouthamer on the Occasion of his 60th Birthday

Dedication iii
Editorial 131
Sonnleitner B.: Quantitation of microbial metabolism 133
Kell D.B., Ryder H.M., Kaprelyants A.S. & Westerhoff H.V.: Quantifying heterogeneity: flow cytometry of bacterial cultures 145
Kooijman S.A.L.M., Muller E.B. & Stouthamer A.H.: Microbial growth dynamics on the basis of individual budgets 159
Koch A.L.: Quantitative aspects of cellular turnover 175
Westerhoff H.V., van Heeswijk W., Kahn D. & Kell D.B.: Quantitative approaches to the analysis of the control and regulation of microbial metabolism 193
van Dam K. & Jansen N.: Quantification of control of microbial metabolism by substrates and enzymes 209
Egli T.: On multiple-nutrient-limited growth of microorganisms, with special reference to dual limitation by carbon and nitrogen substrates 225
Heijnen J.J.: A new thermodynamically based correlation of chemotrophic biomass yields 235
de Hollander J.A.: The use of stoichiometric relations for the description and analysis of microbial cultures 257
de Hollander J.A.: Application of a metabolic balancing technique to the analysis of microbial fermentation data 275
Linton J.D.: Metabolite production and growth efficiency 293
van Verseveld H.W., Metwally M., el Sayed M., Osman M., Schrickx J.M. & Stouthamer A.H.: Determination of the maximum product yield from glucoamylase-producing *Aspergillus niger* grown in the recycling fermentor 313
Verduyn C.: Physiology of yeasts in relation to biomass yields 325
Bulthuis B.A., Rommens C, Koningstein G.M., Stouthamer A.H. & van Verseveld H.W.: Formation of fermentation products and extracellular protease during anaerobic growth of *Bacillus licheniformis* in chemostat and batch-culture 355
Hommes R.J.W., Simons J.A., Snoep J.L., Postma P.W., Tempest D.W. & Neijssel O.M.: Quantitative aspects of glucose metabolism by *Escherichia coli* B/r, grown in the presence of pyrroloquinoline quinone 373
